Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kodama masayoshi (JP 09-152569).

Kodama masayoshi ('569) 's teaching which expressly meets the claimed invention was discussed in the paragraph 2 of the previous office action dated on 4/21/06.

The difference between Kodama masayoshi ('569)'s teaching and the claimed invention is that the edge sensors 3a-3d of Kodama masayoshi ('569) detect the edge of the substrate optically whereas the detection portion of the claims 1, 16 and 20 is recited to detect the edge of the substrate by contacting the edge of the substrate; however, the sensor with non-contact or contact operation would have been obvious to one of ordinary skill in the art as disclosed Honma ('711). Honma ('711) exclusively discloses that a displace sensor can be a non-contact sensor or can be a contact sensor (see page 3, paragraph [0024], last two lines).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to incorporate the teaching of Honma

('711) to have the operation of Kodama masayoshi ('569)'s edge sensors changed from non-contacting to contacting as desired as disclosed by Honma ('711)(see page 3, paragraph [0025], last two lines).

Response to Arguments

2. Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kurita et al (US Patent No. 7,151,981) disclose a method and apparatus for positioning a substrate comprising a plurality of pushers or probes for contacting the edge of the substrate (see claim 1).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emily Y. Chan whose telephone number is 571-272-1956. The examiner can normally be reached on 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ha T Nguyen can be reached on 571-272-1678. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
